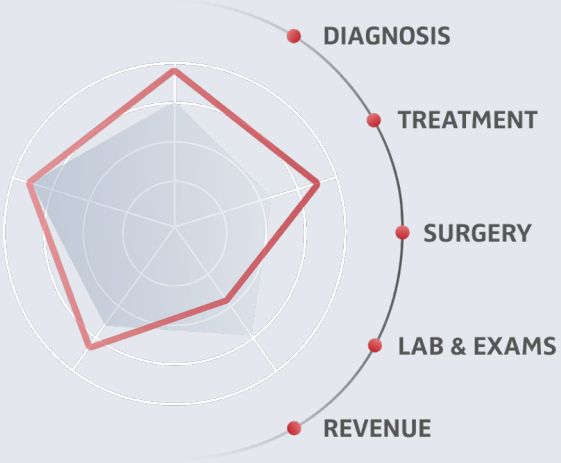
DxPrime Care

Fully Captures Diagnoses Right the First Time

Enhance diagnostic integrity for evidence-based clinical decisions.

NEW

Diagnostic Integrity Radar



Eliminate blind spots

Automated coding of diagnosis

Understand the why behind the what

Make every diagnosis count

Reduce post-discharge corrections

Optimize Diagnostic Documentation

- Identifies undocumented and imprecisely documented diagnoses
- Delivers real-time feedback tailored by specialty and gender
- Improves accuracy and completeness of diagnostic documentation

Think Diagnostically Code Automatically

- Automatically translates diagnostic narratives and decisions into medical codes, including surgical procedures
- Detects left/right laterality mismatches
- Keeps diagnosis and coding in sync across the entire patient stay

Explainable AI for Confident Diagnosis

- Delivers on-demand diagnostic suggestions with supporting clinical evidence
- Powered by AESOP's Clinical Deep Reasoning Network Model
- Enables physicians to make confident, well-justified decisions

EHR Copiloting with Quick Inline Editing

- Integrates seamlessly within existing EHR systems
- Edits diagnostic suggestions instantly without switching screens
- Bridges the gap between diagnostic decision-making and clinical documentation

DxPrime is now a **solution on Mayo Clinic Platform**
